

WESTMINSTER

FEDERAL PARKWAY IMPROVEMENTS PROJECT

PROJECT UPDATES

Federal Parkway concrete work underway in advance of asphalt paving

Concrete placement is underway along Federal Parkway. Drivers should use extra caution and reduce speeds while crews are working adjacent to travel lanes.

Weather permitting, crews will place the final layer of asphalt on the north side of Federal Parkway the week of October 19. This will allow the contractor to shift traffic onto the newly paved north side of the road so crews can complete final paving on the south side.

More information will follow regarding upcoming traffic impacts expected to begin in mid to late October. Drivers are encouraged to use alternate routes when possible.

The above photo shows crews placing concrete median cover in the center of Federal Parkway.

Work Zone Safety

Safety is our top priority. Drivers should proceed with caution through the work zone. Please stay alert for construction crews working near the roadway, as well as for equipment and vehicles entering or exiting the area.

What to Expect During Construction

Drivers should be prepared for work vehicles entering and exiting the work zone. Extra caution is advised. Work activities expected in the coming weeks include:

- Placing concrete median cover.
- Repairing and patching old asphalt pavement sections before final paving.
- Placing embankment along southbound Federal Parkway.
- Placing final asphalt.

Working hours are from 7 am to 6 pm, Monday through Friday. Occasional night work and weekend activities are possible.

The Big Dry Creek Trail is expected to remain open during construction. However, trail users should use caution near the work zone and stay clear of designated construction areas where heavy equipment is in operation.

We are making every effort to minimize inconvenience and to complete work as efficiently and safely as possible.

About the Project

Federal Parkway, designated as a major arterial roadway, is located in north Westminster and serves as an extension of Federal Boulevard. In 2016, the City partnered with the Colorado Department of Transportation (CDOT) to improve the intersection of Federal Boulevard and 120th Avenue. Around the same time, private development widened Federal Parkway from Zuni Street to 122nd Avenue.

Federal Parkway currently functions as an inconsistent corridor, with two travel lanes in some segments and four travel lanes in others. The Federal Parkway Improvements Project will widen Federal Parkway between 120th and 122nd avenues to four lanes, creating consistent travel lanes to support safer, smoother travel for everyone who uses the corridor.

The project will also:

- Build a median to separate northbound and southbound lanes.
- Install bike lanes.
- Add a pedestrian crossing and connection to Big Dry Creek Trail.
- Address drainage issues and improve stormwater quality.

A separate project will add streetlights to this corridor.

Construction began in February 2026 and is anticipated to end in summer 2027.
