

WESTMINSTER

FEDERAL PARKWAY IMPROVEMENTS PROJECT

PROJECT UPDATES

Federal Parkway traffic pattern changes start Friday

Traffic pattern changes on Federal Parkway are expected to begin on or after Friday, August 7. One lane in each direction will shift from the north side of Federal Parkway onto the newly constructed pavement on the south side, opening a new work area for crews.

This week and next, drivers should expect frequent lane shifts and intermittent traffic holds by flaggers along Federal Parkway, at the Zuni Drive intersection, and at nearby driveways while crews place asphalt and restripe the roadway for the new traffic pattern. Travel delays of up to 10 minutes are possible between 8 am and 4 pm. Drivers are encouraged to use alternate routes when possible.

Crews recently completed drainage improvements, concrete curb and gutter installation, and preparation of the new roadway section. Drivers should also expect increased construction truck traffic this week for asphalt paving.

The above photo, taken on July 16, shows the widened section of northbound Federal Parkway just north of 120th Avenue.

The above photo, taken on July 16, shows construction progress on the open drainage channel and water quality pond along the north side of Federal Parkway.

What to Expect During Construction

Drivers should be prepared for work vehicles entering and exiting the work zone. Extra caution is advised. Work activities expected next week, after the traffic pattern change, include:

- Clearing and grading the work area.
- Importing material for construction.
- Continue installing stormwater infrastructure.

Working hours are from 7 am to 6 pm, Monday through Friday. Occasional night work and weekend activities are possible.

The Big Dry Creek Trail is expected to remain open during construction. However, trail users should use caution near the work zone and stay clear of designated construction areas where heavy equipment is in operation.

We are making every effort to minimize inconvenience and to complete work as efficiently and safely as possible.

Updates will be provided regularly throughout construction.

About the Project

Federal Parkway, designated as a major arterial roadway, is located in north Westminister and serves as an extension of Federal Boulevard. In 2016, the City partnered with the Colorado Department of Transportation (CDOT) to improve the intersection of Federal Boulevard and 120th Avenue. Around the same time, private development widened Federal Parkway from Zuni Street to 122nd Avenue.

Federal Parkway currently functions as an inconsistent corridor, with two travel lanes in some segments and four travel lanes in others. The Federal Parkway Improvements Project will widen Federal Parkway between 120th and 122nd avenues to four lanes, creating consistent travel lanes to support safer, smoother travel for everyone who uses the corridor.

[Subscribe](#) to our email list.

The project will also:

- Build a median to separate northbound and southbound lanes.
- Install bike lanes.
- Add a pedestrian crossing and connection to Big Dry Creek Trail.
- Address drainage issues and improve stormwater quality.

A separate project will add streetlights to this corridor.

Construction began in February 2026 and is anticipated to end in summer 2027.
