Water Supply Line Updates

West 96th Avenue Reopened

Paving work along West 96th Avenue from Teller Street to Pierce Street is complete, and the road is fully open to drivers and pedestrians. Thank you to Mandalay Middle School, Semper Elementary, and all the bus drivers, parents and students for making the first two weeks of school a success during construction.

Ongoing Work

As part of the Water Supply Line Project, crews are completing roadway improvements along Old Wadsworth Boulevard and Westcliff Parkway. Every effort is being made to minimize impacts and inconveniences. Thank you for your patience and understanding as this work is completed as quickly and safely as possible while minimizing impacts on nearby schools. Please note schedules are subject to change due to weather and other factors.

What to Expect Along Wadsworth Boulevard

- Night Work (September 9-11)
 - Road striping and water blasting activities between 94th and 95th Avenues.
 - Construction activity and equipment during evening hours (6 pm to 12 am).
 - Temporary traffic impacts in the work zone
- Night Road Closure (Week of September 21)
 - Full closure of Old Wadsworth Boulevard from Guardian Storage to

- Paving operations within the closure limits.
- Posted detour routes will direct motorists around the work area.

What to Expect Along Westcliff Parkway

Construction to designate an alternate bike route for the detour will take place along Westcliff Parkway and Jay Street in early September. This includes new road markings and tubular lane delineators to create separation between the bikeway and the roadway.

The US 36 bikeway between Wadsworth Boulevard and Jay Street may be detoured as early as the end of September through December to accommodate construction of the Water Supply Line for the Westminster Boulevard Drinking Water Facility. A temporary detour will be in place from the Westcliff neighborhood to Jay St, Westcliff Parkway, to Westminster Boulevard to the US 36 bikeway connection. See map below.

Please keep an eye out for workers and follow all signage and directions for everyone's safety.

Work Zone Safety

As a reminder, please do not enter the construction zone for your safety. Crews are operating heavy machinery and are not always aware of pedestrians in their work area. Please abide by posted sidewalk and road closed signs.

What Else to Expect This Summer

Preparation for Tunneling Near Hyland Village

Preparation is underway to begin tunneling for waterline installation underneath US-36. In the coming weeks, residents of Hyland Village may notice additional silt fencing, tree removal operations, and trail closures associated with this work. Please stay safe around construction areas and check [updated trail closure maps](#).

A new water supply line will transport water from Standley Lake to the new facility by connecting to existing supply pipelines.

Construction on the water supply line began in early 2026 and is expected to last up to 18 months. Please note that the timeline is subject to change.
